

CONGRESSI

10th Workshop on Fats and Oils as Renewable Feedstock for the Chemical Industry

March 17-19, 2019 - Karlsruhe, Germany

The workshop is organized by *abiosus* e.V. in cooperation with the Agency of Renewable Resources (FNR). Financial support by the Federal Ministry of Food and Agriculture (BMEL) is gratefully acknowledged.

The environmentally sound and sustainable use of natural resources is an important worldwide challenge. At present, fats and oils are the most widely used renewable raw materials in the chemical industry, since they offer widespread possibilities for different applications. The Workshop on "Fats and oils as renewable feedstock for the chemical industry" has evolved to a major global oleo chemical meeting, attracting participants from all over the world. Important contributions to the workshop have been documented in special issues of European Journal of Lipid Science and Technology. The 10th Workshop "Fats and Oils as Renewable Feedstock for the Chemical Industry" will discuss new developments as well as future perspectives of the chemical usage of fats and oils including terpenes. Presentations from industry representatives will show the progress in introducing renewable materials to the market.

The workshop in Karlsruhe will cover the following topics (amongst others):

- Chemistry of fats and oils & other renewable resources
- Synthesis of fine chemicals
- Monomer / Polymer synthesis
- Catalysis
- Sustainability
- Introducing renewable materials to the market

IV China-Italy Symposium Organic Chemistry (CISOC)

16-17 Aprile, 2019 - Bologna

The event aims to consolidate bilateral Italian Chinese meetings organized by the Divisione di Chimica Organica of the Società Chimica Italiana.

Previous CISOC editions were held in Shanghai (2010), Padua (2015) and Wuhan (2017).

The event encourages knowledge exchange among the most eminent experts of the two countries in the area of organic chemistry, in order to promote establishment of scientific networking.

The Scientific Program includes 20 Invited Lectures (ILs) and several oral communications (OCs) by early-stage chemists belonging to the two communities.

Therefore, young scientists are particularly encouraged to attend the symposium and submit their scientific contribution. A number of grants covering the registration fee, sponsored by the Division of Organic Chemistry of the Italian Chemical Society, will be available for early-stage researchers.

3rd SUSTAINABLE OILS & FATS INTERNATIONAL CONGRESS

April 4-5, 2019 - Paris, France

You certainly noted that *sustainability* is an increasing trend in the oils & fats market worldwide. Of course, we talk a lot about *sustainable palm oil* in the EU which is largely adopting a certified supply chain. But *sustainability* is not limited to the palm or soybean sourcing, and this trend is expanding outside of European borders. A strong social, environmental and health and nutrition awareness is rising in consumers' minds all around the world. Consequently, new sourcing, technologies, supply chain, certification system, labeling and claims are spreading rapidly, hence creating new business models.

Surprisingly, international congresses are granting at best one session about sustainability. We, at FAT & Associés, have decided to organize an international event in order to gather all industrial and institutional actors, and also decision' markers, around the last disruptive actions surrounding *sustainability*. The 3rd Sustainable Oils & Fats International Congress (SOF-IC2019) will take place on the 4th and 5th of April 2019 in Paris, France.

You are engaged in the sustainability trend, or you would like to understand how far this phenomenon is expanding: join us and share your experience within the community.

Session topics:

Session 1 - Sourcing & Production Sustainable Oils & Fats

Session 2 - Creating, Maintaining, Controlling Sustainable Supply Chain

Session 3 - Economy & Business Reality

Session 4 - Demand and Uses in Food and Non-Food Segments

Session 5 - Consumers' Perception, Raising Awareness Among the Value Chain

10th Annual Conference on Bioenergy and Biofuels. Theme: Devising a sustainable bioeconomy

April 25-26, 2019 - Helsinki, Finland

We cordially invite all the participants from all part of the world to attend the scientific event entitled '10th

Annual Congress on Bioenergy and Biofuels' scheduled during April 25-26, 2019 in Helsinki, Finland. Bioenergy Meet 2019 is the leading conference dedicated to Bioenergy, Renewable Energy and Biofuels researchers with the theme "Devising a sustainable bioeconomy"

The goal of Bioenergy Meet 2019 is to deliver an outstanding program for exchange of ideas and authoritative views by leading scientists which covers the entire spectrum of research in Biofuels and Bioenergy and share the cross-cultural experiences of various production procedures.

2019 AOCs Annual Meeting & Expo

May 5-8, 2019 - St. Louis, Missouri USA

The AOCs Annual Meeting & Expo is a premier international science and business forum on fats, oils, surfactants, proteins and related materials. The extensive technical program, with 10 interest areas, will feature more than 600 invited and volunteer oral and poster presentations.

Please mark in your calendars.

IFT 2019 Annual Meeting & Food Expo of the Institute of Food Technologists

June 2-5, 2019 - New Orleans, USA

The Annual Meeting & Food Expo of the Institute of Food Technologists is organized between 02 Jun and 05 Jun 2019.

Annual Meeting & Food Expo of the Institute of Food Technologists will take place at the Ernest N. Morial Convention Center in New Orleans, Louisiana USA.

IFT 2019, Annual Meeting & Food Expo of the Institute of Food Technologists covers fields like Food Quality, Food Industry, Food Processing Industries, Food Technology and Food Security.

14th World Bioenergy Congress and Expo Theme: Green Revolution: Lets go green to get our globe clean

June 06-07, 2019 - London, UK

With the magnificent success of Bioenergy 2018, Conference Series LLC Ltd is proud to announce the

'14th World Bioenergy Congress and Expo', to be held during June 06-07, 2019 at London UK. Theme of the Bioenergy conference is: 'Green Revolution: Lets go green to get our globe clean' with an objective to encourage young minds and their research abilities by providing an opportunity to meet the experts in the field of Bioenergy. Bioenergy congress is designed to explore various applications in different fields.

Bioenergy technology mainly focuses on usage of Biomass Energy as an alternative source for Energy Production for future generation and aims to bring together leading academic scientists, researchers and research scholars to exchange and share their experiences and research results. Bioenergy 2019 aims to promote various researches on Biomass among scientists, academia and industries. Bioenergy 2019 offers various topics for interaction including Biomass, Bioenergy research, Algal Biofuel Production, Biomass conversion Processes to useful Energy.

For the period 2014-2022 based on the historical years – 2012 and 2013. Projections have been provided for installed capacity (MW), power generation (Million KWh), and revenue (USD Million). The report includes the key market dynamics affecting the demand for biomass power generation feedstock and technologies. As a part of our market dynamics analysis, we have analyzed market drivers, market restraints, and market opportunities. A comprehensive competitive landscape, which includes company market share analysis and market attractiveness analysis, has also been provided in this report. Conferences series LLC has been and will be organizing Bioenergy Conferences and events to put front the research advances. The gathering will highlight the opportunities in both Biomass Conferences and Biofuel Conferences.

Target Audience:

- Bioenergy Associations
- Bioenergy Researchers
- Bioenergy Industry
- Bioenergy Scientists
- Nuclear energy Engineers
- Bioenergy technology Engineers
- Chemical Engineers
- Renewable energy Organizations and Associations
- Solar Energy companies
