

ANNUNCI DI RICERCA PARTNER per progetti di ricerca e trasferimento tecnologico

Enterprise Europe Network (EEN)

Anno 2024
(aggiornato al 30 giugno 2024)

Progetto BOLV20221019007**Combined Processing of Legumes Using Wet, Oil-free Technology**

SME from Latvia active in food processing sector has developed combined wet, oil-free roasting technology of legumes. The result of technology application is roasted legumes with an increased plant-based protein content and low moisture content in the final product. Product may be used as a replacement of animal proteins in the daily diet. Company is looking for distributors of healthy own produced products and outsourced production including from grains supplied by customer.

Dead-line for EOIs: 1 Nov 2024

Progetto TOES20231110025**Basque SME offers technology combining photonics and IoT sensors to monitor quality in food production industrial processes**

A fast-growing innovative Basque startup founded to achieve more efficient and sustainable production by applying photonic solutions to industrial processes is looking for partners interested in either adopting the technology for their quality monitoring processes or integrating it into their portfolio as an added-value feature (joint venture). A commercial agreement with technical assistance is envisaged.

Dead-line for EOIs: 09 Nov 2024

Progetto BRSE20231201006**Swedish Company - Global Leader in Dietary Supplements Manufacturing Seeks Contract Manufacturing Partnerships Worldwide**

This is a leading player in the food industry, specializing in the manufacture of dietary supplements. With an extensive international presence in countries like Sweden, Norway, China, India, the Middle East, and Africa, The Swedish Company is actively expanding its reach in Europe, Asia, and Africa. The company aims to establish strategic partnerships with contract manufacturers possessing GMP and Halal certifications to enhance its global market share

Dead-line for EOIs: 17 Nov 2024

Progetto TOES20231204004**Accelerated shelf-life studies in food products**

A Spanish technological center offers accelerated shelf-life studies in food products. This method allows to predict the behaviour of the products and anticipate their evolution under the usual storage and distribution conditions. To achieve this, an estimate is made using predictive models in which the parameters that most influence its deterioration are modified, such as temperature, humidity, and light, among others.

They seek commercial agreement and/or R&D agreement.

Dead-line for EOIs: 03 Dec 2024

Progetto BOCZ20221208018**Czech innovative company and producer of vertical hydroponic growing systems for growing herbs, fruits, vegetables and microgreens is looking for distributors for international cooperation**

The company, engaged in research, development and production of indoor vertical systems, technologies and elements for growing plants under artificial lighting, is looking for trade intermediaries (distributors/agents/representatives) or franchise partners to distribute, represent or offer its products on external markets.

Dead-line for EOIs: 07 Dec 2024

Progetto TOTR20240105014**Turkish Agricultural Research Institute looking for partnerships for applying under HORIZON-CL6-2024-FARM2FORK-01-2: New healthy and sustainable food products and processes project call**

Turkish Agricultural Research Institute has been expertised mainly on the breeding of field crops and horticulture as well as seed production and conservation of these genetic resources, protection of these plants from stressors in soil to provide food safety and nutrition.

Dead-line for EOIs: 04 Jan 2025

Progetto RDRCO20231221024**Colombian foodtech is in search of partners to collaborate in the creation of research, development, and innovation (R&D&I) projects, as well as to identify financing opportunities in the agri-food sector.**

The foodtech is an entity with over 21 years of experience in the agro-industrial sector. Seeking to contribute through a comprehensive portfolio of services that encompass research in globally relevant thematic areas, laboratory testing services, knowledge transfer activities, design and development of food products, specialized consulting, as well as the formulation and execution of research, technological development, and innovation (R&D&I) projects.

Dead-line for EOIs: 12 Jan 2025

Progetto BOGR20230113005**Greek SME producing award-winning organic extra virgin olive oil is looking for international partners under distribution services agreement**

A sustainable Greek company specialised in processing organic extra virgin olive oil, is interested in finding commercial agents or distributors for its products. Koroneiki olives are considered to be one of the finest varieties in Greece, and the extra virgin olive oil made by the company from these olives is produced from their privately-owned and strictly organic orchard with official recognition for

its label in terms of its balanced and fruity taste. This Greek company does not focus only on making profits, but actively works to deliver sustainability, food and feed safety, and fight extinction and abuse of animals.

Dead-line for EOIs: 12 Jan 2025

Progetto BOUA20230129001

Ukrainian manufacturer of natural and healthy snacks is looking for reliable partners abroad under a commercial agency agreement or a distribution agreement

Ukrainian producer of natural food products manufactures its products only from plant components - vegetables, fruits, dried fruits, nuts. The products do not undergo heat treatment, so they retain all trace elements, vitamins, antioxidants and enzymes. They do not contain sugar/preservatives and any harmful additives.

The manufacturer is now looking for new reliable commercial partners abroad.

Dead-line for EOIs: 28 Jan 2025

Progetto BOIT20240411010

An Italian producer offers its fish and food preserves under distribution services agreements

This Italian company, established in 1913, offers fish and food preserves under distribution services agreements with international partners. The production cycle is entirely carried out in Italy, starting from "round" yellowfin tunas. Thanks to its dedication to quality and its ability to combine technology and tradition, the company guarantees a premium quality product, appreciated and established in the Italian and international markets.

Dead-line for EOIs: 11 apr 2025

Progetto TOPL20240507014

Polish startup specializes in plant-based fats offering healthy, sustainable alternatives to animal fats with zero trans fats seeking for investors and business partners: producers of confectionery and sport nutrition to further develop their innovative products

The startup company, operating since November 2023, specializes in manufactures of trans-fat free edible fat from vegetable oil. The functional dietary fats are a healthy alternative to animal fats such as butter, lard, and dairy fats. In addition, they develop two innovative products as an alternative to milk fat from raw olive pomace oil: dairy-free butter and cream without palm oil.

Dead-line for EOIs: 8 May 2025

Progetto RDRRO20230526011

A Romanian research institute is looking for partners for Eurostars calls

The Romanian research institute is looking for international partners (SMEs, SME + research organization) involved in the production of food/food

supplements or feed additives to form a consortium in the next Eurostars calls (September 2023, March 2024).

The main topics are the valorization of raw materials from natural renewable resources (plant peptide-rich protein hydrolysates) and identification and quantification of chemical compounds by conventional and modern methods; valorization of agri-food waste/by-products; classical and modern methods of extraction of active ingredients from yeasts and medicinal and aromatic plants with applications in the food and feed sectors.

Dead-line for EOIs: 25 May 2025

Progetto TRIT20230512014

Smart packaging solutions for food freshness monitoring: new partners are sought for tailored development and industrial scale-up

A highly scientific Italian start up and academic spin off devoted to transfer chemical sensing knowhow into smart packaging solutions for freshness monitoring of perishable foods, developed and patented several lab-tested prototypes. New partners are sought for tailored development and industrial scale-up under Commercial agreement with technical assistance or Research and development cooperation agreement.

Dead-line for EOIs: 15 May 2025

Progetto TRES20230526017

Spanish Natural ingredients company looks for new scientific evidence technologies to incorporate in its research and manufacturing processes. Collaboration under r&d , commercial with technical assistance or investment agreements is offered

A Madrid based natural ingredients innovative SME, with a well established product portfolio, premium brands and presence in more than 40 countries, looks for collaborations in order to incorporate new technologies (extraction, drying, packaging) and/or new products (natural origin) for its sustainable healthy food supplements category . The company, looks for researchers, entrepreneurs or innovative smes willing to collaborate under r&d, investment or technical agreement.

Enterprise Europe Network (EEN)

È la rete nata nel 2008 per volontà della Commissione Europea con l'obiettivo di supportare l'innovazione, il trasferimento tecnologico e l'internazionalizzazione di piccole e medie imprese ed enti di ricerca.

Si avvale di oltre 600 organizzazioni presenti in 60 paesi e offre un sistema integrato di servizi gratuiti per aiutare le imprese a individuare nuovi partner commerciali, produttivi e tecnologici all'estero; per promuovere la partecipazione ai programmi Europei per la ricerca, come Horizon Europe, e per fornire gli strumenti utili per essere più competitivi sui mercati internazionali, migliorando la conoscenza dei mercati e della legislazione europea.

In Lombardia i servizi di Enterprise Europe Network sono garantiti da **Simpler** (Support Services to IMProve innovation and competitiveness of businesses in Lombardia and Emilia-Romagna), di cui Innovhub SSI è partner.

Come ti può aiutare la rete EEN?

Far crescere l'azienda e sostenere l'internazionalizzazione:

- Informazioni sulla legislazione EU
- Informazioni e assistenza sul Regolamento REACH
- Ricerca di finanziamenti a supporto delle imprese
- Supporto per l'individuazione di opportunità commerciali all'estero
- Sostegno per lo sviluppo di nuovi prodotti o processi

Sviluppare partneriati:

- Supporto alla partecipazione a brokerage event e company mission e per la conclusione di accordi di trasferimento tecnologico
- Assistenza nella ricerca partner

Implementare processi di innovazione e trasferimento tecnologico:

- Servizio di analisi delle capacità di gestione e miglioramento dell'innovazione
- Supporto al trasferimento tecnologico/open innovation
- Informazione su bandi di finanziamento e supporto alla partecipazione a programmi di ricerca
- Pre-screening delle proposte progettuali EIC Accelerator

I servizi della rete EEN sono gratuiti.

Per cercare il tuo partner in Europa, consulta il nostro database: <https://een.ec.europa.eu/partners>
