

..... CONGRESSI

Fats & Oils International Conference - Exhibition (FOIC)

6-8 March 2025 | JW Marriott Sahar, Mumbai, India

The conference will focus on "Technological Innovations, Efficiency & Value Addition Following Principles of Green Chemistry."

This theme emphasizes value addition in Fats & Oils processing, from seed to oil, protein, and by-products. Given the industry's thin margins, it's essential to maximize value from all products, whether for human or animal consumption, oleochemicals, or biodiesel feedstock. Energy efficiency is also crucial, as it improves process economics and supports environmental sustainability.

Emerging biotech techniques, such as enzyme usage, are set to revolutionize oil processing and byproduct production.

Food safety is another key focus, particularly minimizing undesirable products during processing and the role of packaging materials.

The event will also highlight the latest analytical instruments for quality control and the importance of process automation through PLC/DCS systems for precise control.

FOIC 2025 will be an invaluable event, providing a platform for global industry leaders to discuss and interact through presentations and deliberations.

NIOP Annual Convention

16-18 March 2025 | Omni Rancho, Las Palmas Resort & Spa, California, USA

The NIOP – National Institute of Oilseed Production organizes the hub for industry-wide networking, offering a unique platform to connect with fellow professionals, exchange insights, and build valuable relationships. Attendees can look forward to engaging discussions with industry thought leaders, gaining invaluable perspectives on the latest trends and innovations. Beyond the enriching experience of knowledge sharing, the Convention also offers a vibrant social atmosphere, providing opportunities to unwind, relax, and simply enjoy the camaraderie of like-minded individuals. The 2025 Convention promises to be an exceptional event, setting the standard for industry-wide networking, featuring enlightening discussions with leading industry figures, and providing a captivating environment for socializing and relaxation. Attendees will not only bask in the wealth of professional opportunities but also immerse themselves in the breathtaking beauty of the California

landscape. It's a combination of business and leisure that ensures an unforgettable experience for all who attend.

2025 International Biomass Conference & Expo

18-20 March 2025 | Cobb Galleria Centre, Atlanta, Georgia, USA

The 18th annual International Biomass Conference & Expo unites industry professionals from all sectors of the world's interconnected biomass utilization industries—biobased power, thermal energy, fuels and chemicals.

Organized by BBI International and produced by Biomass Magazine, this event brings current and future producers of bioenergy and biobased products together with waste generators, energy crop growers, municipal leaders, utility executives, technology providers, equipment manufacturers, project developers, investors and policy makers. It's a true one-stop shop – the world's premier educational and networking junction for all biomass industries.

International Biomass Conference & Expo is where future and existing producers of biobased power, fuels and thermal energy products go to network with waste generators and other industry suppliers and technology providers. It's where project developers converse with utility executives; where researchers and technology developers rub elbows with venture capitalists; and where Fortune 500 executives and influential policy makers sit side-by-side with American farmers and foresters.

International Biomass Conference & Expo is the largest, fastest-growing event of its kind. In 2024, this event is expected to draw nearly 900 attendees. In 2024, the event drew more than 900+ attendees. This growth is fueled by a world-class Expo and an acclaimed program.

Once again, the 2025 International Biomass Conference & Expo program will include 30-plus panels and more than 100 speakers, including 90 technical presentations on topics ranging from anaerobic digestion and gasification to pyrolysis and combined heat and power, all within the structured framework of four customized tracks:

Track 1: Pellets & Densified Biomass

Track 2: Biomass Power & Thermal

Track 3: Biogas & Renewable Natural Gas (RNG)

Track 4: Sustainable Aviation Fuel (SAF)

International Biomass Conference & Expo will help biomass industry stakeholders identify and evaluate technical and economic solutions that fit their operation. It's time to tap into the revenue generating potential of sustainable biomass resources.

See the event page for the full Program and updates:

Argus Agriculture & Feedstocks Conference

20-21 March 2025 | Buxelles, Belgium

Driving the future of the agriculture market and its role in providing solutions to the energy sector for decarbonisation. Agricultural markets are navigating significant challenges, from adverse weather and the Russia-Ukraine conflict to changing consumer preferences and evolving trade dynamics. Amid these disruptions, the global move towards energy transition is driving new investments and pushing agriculture to adapt. This shift is vital for addressing climate change while producing sustainable bioenergy and quality food.

The Argus Agriculture & Feedstocks Conference, a revolutionised evolution of the Argus Agritel Paris Grain Conference, brings together industry leaders to examine the production and market dynamics of grains and oilseeds. Building on a legacy of excellence, the event now offers a broader focus, covering agriculture's pivotal role in supporting the energy sector's transition and exploring innovative solutions to unlock global feedstock potential to meet growing demand.

Gain key insights, build strategic partnerships, and uncover innovative opportunities at the crossroads of agriculture and energy. Whether you work in agriculture, biofuels, or energy production, this event provides a platform to influence the future of sustainable practices and advance the global energy transition.

5th International Oil palm biomass conference 2025

14 - 15 April 2025 | Kuala Lumpur, Malaysia

As the world transitions into renewables, oil palm biomass has been flagged as one promising resource. Not just to generate biofuel and electricity but also to convert into higher value products which will find demand in the global economy striving to embrace sustainability. The fact that there is a fortune waiting is no longer a secret. Many studies have confirmed the presence of the untapped gold in oil palm biomass. Much work has gone into developing the right technology and business model to transform the oil palm biomass from a waste burden to a new climate-friendly resource that the world craves for. Countries around the world, including Malaysia, have already launched blueprints and roadmaps to tap on the vast wealth of the oil palm biomass.

The biggest suppliers are Indonesia and Malaysia. But the region is eagerly eyeing the diverse business potential that the oil palm biomass promises. This international oil palm biomass conference would provide a splendid platform to know and understand more about the immense business potential that the oil palm biomass offers.

This conference aims to bring together experts, industry leaders, researchers, and policymakers from around the world to discuss the latest advancements, innovations, and challenges in the field of oil palm biomass. It offers unparalleled opportunities for networking, education, and business development in the biomass industry. It's a great platform to learn about advancements, discover new technologies, and connect with global leaders and stakeholders.

AOCS Annual Meeting & Expo

27-30 April 2025 | Portland, Oregon, USA

OCS is a community of scientists, technicians, nutritionists, researchers and other industry professionals advancing the science and technology of edible oils, fats, proteins, surfactants and related materials. AOCS is a leading international society with more than 2,000 members around the world.

The AOCS Annual Meeting & Expo is a premier international science and business forum on fats, oils, surfactants, proteins and related materials.

The annual meeting features a multidisciplinary technical program including 80+ sessions, special sessions including presentations on trending industry topics, networking events and receptions, and more. The technical program in 10 interest areas features more than 600 oral and poster presentations, plus additional break out sessions around important trending topics:

- Analytical
- Biotechnology
- Edible Applications Technology
- Health and Nutrition
- Industrial Oil Products
- Lipids Oxidation and Quality
- Phospholipids
- Processing
- Protein and Co-Products
- Surfactants and Detergents

15th ICIS World Surfactants Conference

7 - 8 May | Jersey City, USA

This is the premier event in the surfactants calendar, as the industry continues to play an increasingly important role in the global economy, from essential functions like health and hygiene to emerging, fast-growing applications in nanotechnology, 3D printing, precision agriculture and many

others.

Join leading consumer brands, industrial companies, manufacturers, feedstock providers and technology companies as we drive forward the future of surfactants.

Stay informed about the surfactants market. Explore a comprehensive program, featuring exclusive sessions on regional advances, market dynamics and industry innovations.

Meet the entire value chain. Our conference delivers a valuable and meaningful experience for everyone as we offer numerous opportunities for networking and collaboration, aiming to foster a dynamic and productive environment for all delegates. Key themes:

Accelerating Innovation. Examine how consumer trends and the adoption of sustainability principles are driving innovation in surfactant technologies. Learn how companies are developing cutting-edge solutions to meet evolving market demands while aligning with environmental goals.

Collaboration. Explore the impact of mergers and collaboration across the value chain in the surfactants industry. Delve into the role of biotechnology advancements and increased cross-industry investment in renewables as key drivers of sustainable growth and innovation.

Strategy. Discover how megatrends and evolving regulations at federal, state, and local levels impact success across the surfactants value chain.

Argus Biofuels & Feedstocks Asia Conference

22 - 24 April | Singapore

Fuelling global collaboration and business: Asia's premier biofuels and feedstocks event.

The Conference serves as a vital platform to explore the latest developments in biofuel production and the diverse feedstocks that support this growing sector. The event offers a unique opportunity for participants to network, forge partnerships, and collaborate on solutions that can drive the biofuels industry towards greater sustainability and scalability in the coming years.

This is the flagship pan-Asian industry event which gathers 400+ senior representatives from 30+ countries across three days. Discuss key challenges and opportunities for the sector, including advancements in feedstock diversification, efficiency improvements in biofuel production, whilst exploring the commercialisation of new biofuel pathways, including bio-naphtha for sustainable chemical and plastic production, the opportunities for ethanol blending, as well as the growing demand for biofuels in the marine and aviation sectors.

See the conference website for more information: <https://www.argusmedia.com/en/events/conferences/biofuels-and-feedstocks-asia-conference>

IGC Grains Conference

10 - 11 June | London, UK

The aim of the conference is to bring to the International grain conference a wide range of topical issues, some within the industry but also to look at those outside the industry, such as geopolitics, that over the next few years will be major influencers within Agri-Business and policymaking.

Being part of a series of related industry events under the banner "London Grains Week", the International Grains Conference is a truly global platform for dialogue between policymakers and operators across the entire grains value chain. The event will be held over two full days, devoted to discussions surrounding the challenges, risks and opportunities in global trade, such as Trade finance, Biodiversity, ports connectivity and grains trade.

Trade opportunities will be explored in 2 regions: Africa and Middle-East. The event comprises a number of commodity-specific workshops, covering topical issues affecting markets for grains, rice, oilseeds, pulses and related sectors.

Check program updates at:

<https://www.igc.int/en/conference/confhome.aspx>

World Bio Markets

10 - 11 June | The Hague, Netherlands

World Bio Markets is a two-day, business development event for the global industrial biomanufacturing sector.

We facilitate commercial connections and generate deal flow between bio-developers and producers, global brands and buyers, community enablers, investors and financiers and suppliers.

Our unique 'meetings first' format makes it easy for companies to meet new customers and partners, grow new business development pipelines, generate sales, secure investment and scale at a faster rate than without us.

World Bio Markets takes a unique "meetings first" approach, prioritizing highly targeted, pre-arranged 1-2-1 commercial meetings that are key to accelerating growth in the sector.

By removing the element of luck from traditional networking, this format offers the most cost-effective and time-efficient way for you to connect with the new customers and partners needed to scale your businesses.

World Bio Markets is the industrial biomanufacturing conference dedicated to driving the commercialisation of the industry; where pre-arranged 1-2-1 commercial meetings are the focus; that attracts consumer-facing global brands;

with a truly international audience.

Companies attend World Bio Markets to meet potential new customers and partners; grow their new business development pipeline; build relationships with global brands; find investment; position themselves as bioeconomy pioneers and thought leaders.

Oleofuels 2025

11t - 12th June | Barcelona, Spain

It is the 16th edition for professionals and experts in the field of oleofuels, providing a unique platform for networking and knowledge exchange.

In this two-day conference, industry leaders, manufacturers, researchers, policymakers, and market experts will come together to discuss the latest advancements, challenges, and innovations in the field of oleofuels. The event will feature informative presentations, interactive panel discussions, and engaging networking sessions.

ACI's Oleofuels 2025 conference offers a valuable opportunity to gain insights into the current market trends, learn about the most recent technological developments, and explore potential collaborations within the industry. It will provide participants with an in-depth understanding of the global oleofuels market, its future prospects, and the regulatory framework shaping the industry.

By attending this conference, you will have the chance to meet and connect with over 300 professionals from various sectors related to oleofuels.

The event represents an ideal platform for expanding your professional network and fostering new

business relationships.

Call for papers is open. See updates at <https://www.wplgroup.com/aci/event/oleofuels/>

16th ISSFAL Congress

29 June - 2 July 2 | Québec City, Canada

The event will bring together leading experts, researchers, and industry professionals to share groundbreaking insights on lipid and fatty acid science. The aim is to create an environment where the scientific and industry communities can connect and build lasting relationships. Along with engaging sessions, you'll have the chance to network with peers and enjoy the rich cultural heritage of one of North America's most historic cities.

The ISSFAL 2025 abstract submission portal is OPEN! Don't miss your chance to showcase your work at the premier global event in lipid science and nutrition.

Some of Conference Topics:

Lipidomics and Precision Nutrition in Cardio-metabolic Disease Prevention

The Role of Fatty Acids in Retinopathy of Prematurity

Application of Lipids for Oral Delivery of Small Molecular Drugs and Peptides

Blue Transformation of Food Systems for Sustainable Lipid Production

The Role of VLC PUFA in Retinal Health and Disease

The Potential of Lipidomics for Population Health Research
